

MASUM ALI

FOUNDER OF IDEAL DESIGN WORK

I began my journey in the field of technical education.

My time at ITI, Arab Ki Sarai, Nizamuddin was instrumental in shaping my career trajectory. The education and guidance provided by the faculty not only equipped me with the necessary skills and knowledge but also instilled in me a passion for the field of technical design and engineering. It was during my time at ITI that I discovered my aspirations for the future and laid the groundwork for my professional ambitions.

After completing my diploma, I was fortunate to secure a position at Bharat Electronics Limited (BEL) Company India Government, where I honed my skills and collaborated with like-minded individuals. Inspired by this experience, I co-founded Ideal Design Work, a company offering draftsman-related and civil engineering consultancy services across India. Today, I am proud to lead a team of 15 employees and witness our company's annual revenue reaching Rs 50-70 lakh.

My journey from being a student at ITI to becoming the founder of a successful venture has been nothing short of transformative. I am grateful for the solid foundation provided by my alma mater, and I am committed to furthering my professional growth and contributing to the technical design and engineering industry.

Thank you
